

Muhammad Huzaifa

Web Developer

Multan, Pakistan | huzaifa77pr@gmail.com

PROFESSIONAL SUMMARY

I am a dedicated Web Developer with hands-on experience in building responsive, full-stack web applications. My expertise bridges the gap between frontend and backend, using HTML, CSS, JavaScript, Tailwind CSS, Angular, Vue, and Next.js to craft modern, mobile-first interfaces. On the server side, I utilize Node.js, Express.js, PHP, and Laravel to develop robust logic and scalable APIs. I am committed to writing clean, optimized code and rely on Git and GitHub for efficient version control, ensuring I deliver high-performance solutions while following modern web development best practices.

SKILLS

HTML	CSS	Tailwind CSS	JavaScript	Angular
Vue	Next.js	PHP	Laravel	NodeJS
MongoDB	Express JS	Git Github

WORK EXPERIENCE

Web Developer

HATtech Media Company

Refined front-end development proficiency through a structured mentorship at HATtech Media Company, gaining advanced technical insights under the direct guidance of industry experts.

PROJECTS

CIMS Cafe ERP

Developed a comprehensive Cafe ERP system with modules for order management, inventory tracking, billing, and reporting. Built with modern web technologies for streamlined cafe operations.

HAT Tech Media Website

Designed and developed a professional media company website with responsive layout, service showcases, portfolio sections, and contact integration. Focused on clean UI and cross-browser compatibility.

Mordees ERP System

Built a full-featured ERP system covering sales, purchases, inventory, and financial reporting modules. Implemented robust backend logic with user authentication and role-based access control.
